

G R A N I T

Thanks to a completely new, patented production technology, one of the most original porcelain sets in the world has been created - with its unique appearance of indistinguishable from true granite. Available in unglazed raw version as well as with the glossy glaze.

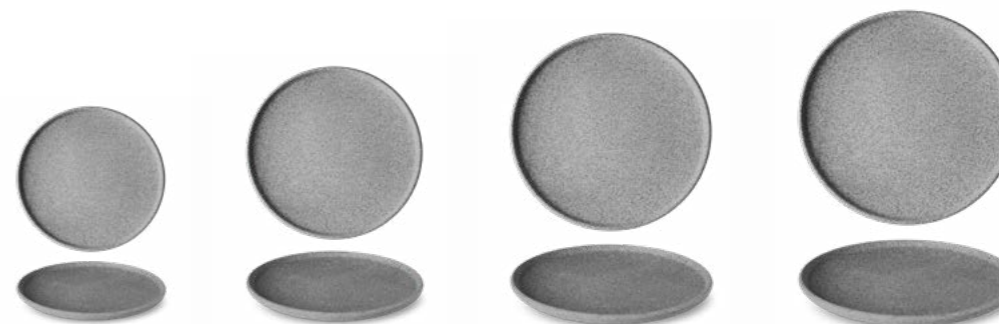

The porcelain collection Granit is indistinguishable from the real granite because of its unique look. It's produced by the new patented technology in the porcelain factory of G. Benedikt in Karlovy Vary. The products are available in rough matt or shiny glazed execution.

„We are very satisfied and happy by using this collection. It gives another additional value to our food“
says the chef Radek Šubrt.
